

YEARS ARE NOT TRUE: ADDITIONAL STUDY, BOOKS AND STORY USE

As I have said before, depending on the type of course, online courses can be followed by students in the 10th, 12th, graduates, professionals and even retirees.

Age doesn't really matter here! All you need to have an Internet connection, a device to access course content, will learn and sign up for courses.

RULES FOR GREATER DEVELOPMENT

This is a year of skills development. The government has introduced the Skill India program to develop skilled workers in India.

These days, employers are not only looking at a healthy educational background. They also look at whether the candidate has useful skills.

Online courses increase skills in the environment. They are designed to pass on new skills to students. Such programs also give us an opportunity to hone our skills.

Skills learned online can help us to find a job that we have always dreamed of. It can help us too to get one promotion!

In this age of to-head competition, it's hard to sit ahead of the competitors. Advanced skills will help one to stand out from the crowd. And skills development is something that online courses are known for!

ACCESS TO JOBS AND EASY AVAILABILITY OF LEARNING HOMES

You will be able to find many institutions and websites that offer online courses in India.

Government has also introduced online learning efforts such as SWAYAM, NPTEL and online government education programs.

If you are looking for options, you will not be disappointed. You have so many different courses and institutions / websites to choose from!
